Professional Summary

Creative and motivated Full-Stack Software Developer with a Bachelor of Science in Computer Science and hands-on experience building modern web applications, AI systems, mobile apps, and business platforms. I enjoy designing complete software systems from idea to deployment. My focus is solving real-world problems using scalable architecture, clean code, modern user interfaces, cloud deployment, and AI technologies.

Technical Skills

- Frontend** React, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Vite
- Backend** Node.js, Express.js, REST APIs
- Database** PostgreSQL, MySQL, Prisma, Supabase
- AI Tools** Google Gemini AI, Retrieval-Augmented Generation (RAG), AI Chat Systems, Prompt Engineering
- Mobile** Android Development, Capacitor, Progressive Web Apps (PWA)
- Cloud & Tools** Git, GitHub, Render, Netlify, VS Code, Cursor AI, Photoshop, Canva

Featured Software Projects

Alberta Driving Test Practice

Android & iOS mobile application for Alberta Class 4, Class 7, and Canadian Citizenship practice.

- **Highlights:** AI-powered study assistant, Quiz system, Progress tracking, Mobile-first design, Published mobile application
- **Technologies:** React, Node.js, PostgreSQL, Gemini AI, Android, iOS
- **Link:** Google Play Store

Biet App

A community rental platform built for Eritrean and Ethiopian communities.

- **Highlights:** Property listings, Rental search, Community-focused platform, Full-stack architecture
- **Website:** bietapp.com

AI ChatGPT Clone

Modern AI chat platform with authentication and conversation history.

- **Highlights:** AI conversations, Secure authentication, Responsive UI, Backend API, Cloud deployment
- **Live Demo:** AI Chat Platform

Evangadi Forum

Modern community discussion platform.

- **Highlights:** User authentication, Questions and answers, AI integration, Responsive interface, Production deployment
- **Live Demo:** Evangadi Forum

MovieFlix

Movie discovery application.

- **Highlights:** Movie search, Categories, Responsive design, Modern UI
- **Live Demo:** MovieFlix App

Professional Experience

2023–Present **Full Stack Software Developer**, *Personal & Community Projects*

- Designed and developed complete full-stack web applications from concept to production.
- Built scalable REST APIs using Node.js and Express.js framework.
- Designed relational database schemas utilizing PostgreSQL, MySQL, Prisma, and Supabase.
- Integrated intelligent AI features leveraging Google Gemini and RAG architecture.
- Built and deployed cross-platform Android and web applications.
- Managed production application deployments using cloud platforms like Render and Netlify.
- Engineered modern, responsive, and accessible user interfaces using React and Tailwind CSS.
- Delivered tailored software solutions for local businesses and community organizations.

Apr 2025–Jun 2025 **Production Associate**, *Kingswood Cabinets*, Calgary, Alberta

- Operated manufacturing equipment safely and efficiently.
- Maintained strict product quality and accuracy in a fast-paced production environment.
- Collaborated effectively with team members to consistently meet daily production goals.
- Adhered strictly to workplace safety procedures and best practices.

Manufacturing Associate, *Ply Gem Canada*, Calgary, Alberta

- Assisted with the manufacturing and assembly of window and building products.
- Operated various pieces of production equipment and machinery.
- Performed detailed quality inspections to ensure product standards were met.
- Followed all established safety and production guidelines.
- Worked efficiently in a collaborative, team-oriented environment.

Education

2012–2017 **Bachelor of Science (BSc) in Computer Science**, *Eritrea Institute of Technology*,
Mai Nefhi, Eritrea

Certifications

- Google Prompt Engineering
- Accounting & Payroll (CDI College)
- Coursera Professional Courses (Accounting & Management)

Strengths

- Problem Solving
- Software Architecture
- Full Stack Development
- AI Application Development
- Cloud Deployment
- Fast Learner
- Team Collaboration
- Creative Thinking
- Database Design
- Mobile App Development

Languages

Fluent English, Tigrinya, Amharic
